## DETAILED ACTION

### *Priority*

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/098,308, filed on 3/18/2002.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokoyama (EP 0981215 A2).

Yokoyama teaches a bi-directional optical amplifier comprising: an up and a down transmission lines opposing each other (figure 5); amplifiers (2a and 2b) provided on each of the transmission lines; monitoring light folding back lines (figure 5) connected between the two transmission lines, the folding-back lines including wavelength selective reflecting means (6) for transmitting monitoring light, variable optical attenuators (4) and optical couplers (3c and 3d ) located on the input side of each amplifier.

The structure recited above reads on claims 1, 3 and 8.

Art Unit: 3663

Claims 15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohta et al teach a fold-back line with reflectors (38 and 39 for transmitting a monitoring signal from one bi-directional line to the other.
